

MAMBA Primer pocket cleaner

A tool for the removal of the burnt residue at the bottom of the primer pocket.

- Primer detonation leaves a burnt residue at the bottom of the primer pocket;
- Removal is necessary to ensure that a new primer is mounted correctly and equally deep;
- It is important to make sure the cleaner does not fit too stiff and possibly damages the sidewalls of the primer pocket;
- Be careful to use it in such a fashion to only remove the residue at the bottom of the pocket without damaging the case material.

- The **MAMBA** primer pocket cleaner is all-metal;
- The cleaning tip is manufactured with engineering quality SOMTA High Speed Tool Steel that will retain its effectiveness for a long time.
